

Using TestComplete

Course Overview

This course provides a comprehensive overview of Automated Testing used AutomatedQA's TestComplete. The course will cover the main features of TestComplete, and at the same time introduce concepts that are the foundation to any successful test automation solution.

Duration

This is a three-day course.

Course Contents

At the end of the course you will be able to:

- Identify the tools available from AutomatedQA and describe their purpose.
- Create and modify a Project and a Project Suite.
- Use the Record and Playback features.
- Interrogate Test Objects.
- Create an Automated Test Script using code and keywords.
- Enhance the Test Script through the use of parameterisation and data-driven automation.
- Enhance the Test Script with error handling techniques.
- Write code to wait for objects.
- Analyse Test Results.
- Debug your Test Scripts.
- Follow best practices for creating Automated Test Scripts.
- Identify and use TestComplete's main features.

Who Should Attend

New users of TestComplete that have experience in Software Testing and wish to start creating Automated Test Scripts.

Prerequisites

Understanding testing concepts.

Coding experience - preferably in VBScript or JavaScript
